

**Ajman**

# GOLDCREST DREAMS

These four majestic residential towers are being built in the newest development on the Emirates Highway. Aptly named the Paradise Lakes, it caters to a wide range of tastes and preferences and promises to become an ideal location to take advantage of all that Ajman has to offer.

Known for its diving sites and rolling sand dunes, this Emirate is fast growing into an ideal residential sanctuary for those seeking an active outdoor lifestyle combined with peace, tranquility and well designed living spaces. Ajman also has the added advantage of being the sole Emirate to currently offer residents the opportunity to actually own a property. Every owner has a title deed registered under their own name in the Lands Departments, thereby simultaneously providing them with a much coveted UAE Residents Visa.

Cruising into Ajman city from Sharjah brings you into the corniche, with a fine sandy beach on one side and the city spread out on to the other. From building traditional dhows to the larger trading booms, Ajman is also known for the speedsters that take part in the annual Dubai Powerboat Meet.
